ABSTRACT

What ComicCraft Does

ComicCraft is a web application that uses AI to create complete comics from a simple story prompt. The user provides a story prompt, main character name, setting, tone and art style.

Google Gemini generates the panel-by-panel storyline, narration and dialogue, while **Stable Diffusion** generates illustrations. The comic can be previewed in the browser and exported as a PDF.

PROJECT OBJECTIVE

Five Goals, One Pipeline

01 Story Generation

Generate a structured comic storyline from a simple user prompt.

02 AI Content

Generate narration and dialogue for each comic panel.

03 AI Illustrations

Generate panel illustrations using Stable Diffusion.

04 Preview

Display the completed comic through a web interface.

05 PDF Export

Export the generated comic as a PDF document.

End-to-end AI workflow from prompt to PDF.

TECHNICAL ARCHITECTURE

Three Layers, One Flow

Frontend

User input + comic preview

- HTML
- CSS
- Jinja2

Backend

Routes + workflow

- Python
- FastAPI
- Uvicorn

AI Layer

Story + images

- Google Gemini
- Diffusers
- Stable Diffusion

TECHNICAL WORKING FLOW

From Prompt to PDF

01

Input

Prompt, character, setting, tone, style

02

Gemini Flash

Structured 5-panel outline

03

Gemini Pro

Narration + dialogue

04

Stable Diffusion

Panel illustrations

05

Output

Preview + PDF export

TECHNOLOGIES & TOOLS

The Stack Behind ComicCraft

1

Python

Core programming language

2

FastAPI

Backend web framework

3

Uvicorn

ASGI server

4

Jinja2

HTML template rendering

5

Google Gemini

Story, narration and dialogue

6

Diffusers / Stable Diffusion

AI image generation

7

FPDF

PDF generation

8

Pillow

Image processing

CORE FEATURES

What the App Delivers

- ✓ Story prompt and character customization
- ✓ Setting, tone and art-style selection
- ✓ Gemini-based comic outline generation
- ✓ Narration and dialogue generation
- ✓ AI-generated illustrations
- ✓ Web comic preview and PDF export

EXPECTED RESULT & MVP

Scope and Deliverable

M

MVP Scope

Single-comic generation from one user prompt, with a complete panel-by-panel output.

F

Final Output

Generated storyline, narration, dialogue, illustrations, browser preview and PDF export.

The project follows an end-to-end AI workflow — from user input to a downloadable comic.

THANK YOU
